PROJECTS

Beachhouse—Sep 2024 – Nov 2024

Beachhouse is a Progressive Web App created to simplify booking management for real estate professionals handling multiple properties. Users can track bookings across four statuses (inquiry, quotation, confirmed, and pre-confirmed) and two types (stays or events) across various properties.

- **Next.js & TypeScript** Leveraging Next.js as the primary framework.
- **Supabase** Integration Supabase serves as the backend database.
- **Google Calendar API** Beachhouse uses the Google Calendar API to sync bookings.

GetChef—Feb 2024 – Juin 2024

Led the development of the 'getChef' web platform, revolutionizing the process of booking private chef services. The platform acts as a trusted intermediary, offering users a seamless and secure solution for booking culinary services with ease.

- **React js** Leveraged for its component-based architecture and efficient rendering.
- **Redux** Implemented for state management.

Immorace—Sep 2023 – Jan 2024

Worked on the back office of 'Immo-Race,' a versatile French application aimed at transforming real estate training. The app enables users to validate their training hours according to the ALUR law, engaging them with a multi-themed content library that enhances skills in a fun and effective way.

- **Vue 3** Leveraged for its reactive capabilities to create a dynamic and responsive user interface.
- **Pinia** Employed as the state management solution to maintain app performance and manage data efficiently across the platform.

Clawcrazy—Sep 2019 – Nov 2021

ClawCrazy is an innovative platform that allows users to play real live claw machines and arcade games online, winning actual prizes. The platform features a variety of skill-based games like claw machines, skeeball, coin pusher, and key-master, all playable from anywhere in the world through a web browser or mobile apps available on iOS and Google Play.

- **Vue js.**
- **Firebase SDK** (Realtime Database, Authentication, Storage).
